REACH Guideline (EG) Nr. 1907/2006

Dear Customer,

In the context of the REACH Regulation (EC) 1907/2006, we inform you about our related activities and the current situation in our point of view.

Registration of products applies only to banned substances which are exposed under regular conditions of usage of the products during life time (the disposal not included) and which exceed defined quantity limits. Therefore, we are not obliged to register.

According to article 33 of REACH we will fulfill our information obligations based on the candidate list of Substances of Very High Concern (SVHC).

Karl Kruse GmbH' & CO KG is in accordance with article 3 of the REACH Regulation (EC) 1907/2006, no producer or importer of substances and preparations, and does not bring them in the market.

Our company imports finished products (goods) to the EU, which do not contain required ingredients in a mass fraction of about 0,1% and which are not produced or imported in quantities of 1.000 tons or more per year.

We totally rely on the publications of the manufactures. As soon they have been published, we will make the manufacturers' declarations available to our customers. Please accept that we will not sign any general and comprehensive statements, nor will answer any customer specific questionnaires, due to the complexity of the issue and the number of products and manufacturers.

Please be sure that we will spend all our efforts to fulfill our obligations and give the best possible support to our customers.

For more information, please do not hesitate to contact us at any time.

Best Regards,

Alexander Kruse
